World Health Organization

PRESS RELEASE

For release on May 17th

Accuracy in BP Measurement and Effective Hypertension Control Promoted on World Hypertension Day, May 17th

Measure Your Blood Pressure Accurately, Control It, Live Longer

Raised blood pressure is the biggest single contributing risk factor to global health.

On **World Hypertension Day 2024**, the WHL announces the contributions of the **Children's Art Program** for promoting hypertension awareness in youth, and recognizes our **WHL 2024 Excellence Award Winners** for their stellar contributions to global hypertension prevention and control [at this link](#).

Please join us at our
6th World Hypertension Congress,
February 21-23, 2025
in Chennai, India.

For information [click here](#).

World Hypertension Day is aimed at raising attention on the importance of better hypertension control. This worldwide activity started by the World Hypertension League (WHL) was first held on May 14, 2005, and since then World Hypertension Day has been an ever-expanding yearly event. Its purpose is to communicate to the public the importance of hypertension and its serious medical complications, and to provide information on its prevention, detection, and management.
